

PLAYER		DATE STRUNG	
FRAME		JOB	
Make, model, head size, grip size		Standard / next-day / same-day	
MAINS	REF. TENSION	CROSSES	REF. TENSION
String and gauge	lb	String and gauge	lb

DYNAMIC TENSION AT STRINGING

This is your **baseline**. It measures the stiffness of the whole stringbed, not one string, so it will not match the reference tension above. That is normal. What matters is how far it moves.

FOLLOW-UP READINGS			
DATE	DT READING	DROP FROM BASELINE	NOTES / ACTION

When to restring: once the reading has dropped 25 to 30 percent from baseline, it is usually time. Some players feel it at 20 percent. With any elbow or shoulder history, sooner. There is no schedule that works for everyone, which is why this card exists.
